PROFILE

ServiceTitan Live Services Agent with experience in customer support, scheduling, administration and reporting. University of Toronto Data Analytics Bootcamp graduate who develops personal apps with AI assistance, defines requirements and tests workflows. Experienced in adapting formulas between Excel and Google Sheets and checking results after conversion. Seeking to apply this practical problem-solving to technical support.

CORE SKILLS

Customer communication | Problem solving | Scheduling | Workflow testing | Excel and Google Sheets formula conversion | Data accuracy | SQL and Python foundations | Reporting

PROFESSIONAL EXPERIENCE

Live Services Agent | ServiceTitan
Remote, part-time | May 2025 - Present

- Coordinate scheduling and service support in a high-volume remote customer-service environment.
- Resolve scheduling and service issues through clear communication, careful listening and problem-solving.

Administrative Assistant / Receptionist | Haldimand-Norfolk REACH
Townsend, ON | March 2022 - August 2024

- Supported Family and Youth programs with scheduling, documentation, confidential files and phone inquiries.
- Recorded survey results, created annual charts and prepared service reports for organizational and funding requirements.

Bookkeeper / Payroll Assistant | Disbrowe Chevrolet Buick GMC
St. Thomas, ON | August 2007 - August 2009

- Processed payroll for hourly, salaried and commission employees, including tax documentation, remittances and year-end reporting.

Mid Office Support | Scotiabank
Fort McMurray, AB | August 2006 - August 2007

- Reconciled daily ATM records and maintained financial documentation while supporting customer service and office administration.

SELECTED PROJECTS

Sport Volunteer Helper - Developed a parent volunteer coordination app with AI assistance. Defined attendance, availability, assignment and history workflows; tested changing availability and refined the experience through feedback.

Volleyball Scorekeeping Helper - Developed a guided scorekeeping app with AI assistance. Tested lineups, scoring and substitutions at games, identified workflow issues and directed revisions.

Customer Support Dashboard - Used sample support-ticket data, SQL queries and charts to explore ticket volume, issue categories and response times.

EDUCATION AND TOOLS

Data Analytics Bootcamp | University of Toronto | 2025
Certificate in Office Administration | Fanshawe College
Work tools: Excel, Google Sheets and CC Pro. Project tools: SQL, Python, Plotly and GitHub.
